Here are all persons listed that helped to build NetBpm. In strictly alphabetical order:

Name	Work
Tom Baeyens	He is the founder of the JBpm project and the inventor of the concepts that NetBpm bases on. Most of the NetBpm documentation uses the documentation of JBpm 1.
Jan-Philipp Bolle	He started the project and is the project leader.
Holger Hess	monosupport

Thanks are due to YourKit for providing licenses to NetBpm developers for use of YourKit on NetBpm per YourKit's friendly policy supporting open source projects
